AZONColor: A TRUSTED NAME

AZONColor, one of the most recognized and trusted names in the technical and color graphics business is proud to offer an expansive line of high quality, fully alternative ink replacement products for Aqueous, Latex and Eco Solvent printers. Manufactured in the USA, AZONColor inks and cartridges are designed and tested to work seamlessly to deliver professional quality results.

QUALITY, RELIABILITY & COST SAVINGS

AZONColor inks will provide consistent reliability and the exceptional value you have come to trust with AZONColor brand products. All AZONColor inks are manufactured to ensure the highest level of print quality available today, and all products are ISO 9001 certified. Our inks use the same pigment base as the OEM formulas to ensure high quality color matching without the need for additional profiling saving you time and expense. Our entire ink line is also designed to be plug-and-play to the OEM ink so you never have to worry about flushing the ink system. AZONColor inks also produce excellent test results for adhesion to the vast array of substrates available in our market.

A SOLID GUARANTEE & OUTSTANDING SUPPORT

AZONColor has spent considerable time researching, testing and proving our inks reliability. The combination of our proven methods with careful selection of high performance raw materials ensures consistent results delivering only the highest quality and highest value products to our customers. Every AZONColor ink cartridge is backed with a solid guarantee which certifies that AZONColor ink will not harm print heads and will not void the manufacturer's warranty. At National / AZON we take our acclaimed customer service to a new standard and are very sensitive to the support needs of our customers.

POSITIVE ENVIRONMENTAL IMPACT

AZONColor aqueous ink cartridges offer a major environmental benefit by utilizing the National / AZON Equipment cartridge recycling program available at www.azonequipment.com. The recycling of ink cartridges helps save our environment by reducing the amount of plastic and metal waste deposited in landfills. Over 70% of the used printer cartridges throughout the world currently results in environmental waste. Every AZONColor cartridge for HP saves over 1.5 pounds of metal and plastic environmental waste.

AZONColor FEATURES AND BENEFITS

- Made in the USA Using OEM Matched Pigments
- Excellent Scratch Resistance and Low Odor
- 100% Compatible With OEM Inks
- 100% Guaranteed and Backed by National / AZON Equipment
- AZONColor Ink Cartridges are Environmentally Friendly
- Eco-Solvent and Latex Inks Offer Long Outdoor Durability and Shelf Life
- Plug and Print Performance - Interchangeable at Cartridge Level
- No Need to Purge or Flush Ink Lines When Installing AZONColor Inks
- AZONColor Inks Produce a Wide Color Gamut
- Archival Quality Pigment, Dye, Latex and Eco-Solvent Inks Available
- AZONColor Inks Do Not Affect Printer Warranty
- World Class Reliability and Performance
- AZONColor Inks Save Up to 40% Over OEM Cartridges
- Compatible with OEM ICC Color Management Profiles
- AZONColor Cartridges Distributed by National / AZON Equipment

Here's What Our Customers are Saying About AZONColor Inks:

"I just started using your inks for my Mutoh 1638 and they are running great. I did exactly what you said and just put them in without flushing, they worked flawlessly and the color matching is identical. Thanks again for getting us involved with this ink, the cost savings is great!"

Randall - Phoenix AZ.

"Of course, I was a little reluctant to make a change in my production area but I trusted National / AZON and took the plunge. When I didn't hear a word back from my production team I wasn't worried, I knew that no news is good news. The inks performed in my Roland exactly as they said they would we just dropped them in one by one and had zero issues. The color matched perfectly and our customers are happy. We are saving almost 50% in our ink costs with AZONColor for Roland. I hope my competitors don't find out about this!"

Frank G. - Aurora, IL.

"We were very surprised with the results when using AZONColor Ink. The ability to easily plug and print with the original inks with no loss of quality is true. We are satisfied with the results and look forward to decreasing our cost of operation."

Eugene M. - Corona, CA.

"When looking at the potential cost savings it was a no-brainer to at least test out the AZONColor inks for my Mimaki ES3 printer. When my present inks ran low I simply put the AZONColor replacement inks in and they are working great. I am not seeing any differences except for the huge cost savings. I simply email my purchase orders over to NAE and the inks arrive shortly after that. I would recommend these inks to anyone interested in saving money."

Dave R. - Clawson, MI.

AZONColor Ink

Consumer Question and Answer

Q: WILL USING AZONColor EQUIVALENT CARTRIDGES VOID THE PRINTER WARRANTY?

No. The Magnuson-Moss Warranty Act prohibits the manufacturer of the printer from voiding the warranty because you use equivalent cartridges. Printer manufacturers will almost always advise you against using non OEM cartridges. The simple reason for this is that manufacturers would like you to buy their expensive cartridges and accessories. With the protection of this law, you should feel confident that AZONColor cartridges will meet or exceed your expectations.

Q: HOW MUCH MONEY WILL I SAVE BY USING AZONColor INK?

Your savings may vary depending on your printer. As a rule of thumb, you can expect to save 35-40% Consumers like the fact that they are saving money and at the same time, protecting the environment. Over the life of a printer most companies can expect to save thousands of dollars.

Q: IS THERE A DIFFERENCE IN QUALITY USING AZONColor INK?

Not at all! There will be no difference in the print quality after the cartridge is installed. AZONColor inks are compatible with OEM color management profiles. Our 100% money back satisfaction guarantee is a sign of our confidence and removes any risk from you trying AZONColor ink.

Q: ARE AZONColor INKS GUARANTEED?

Yes, we stand behind our products with a solid money back guarantee. If you are not satisfied with AZONColor ink products, simply return them to where you purchased them for a complete refund.

Q: ARE AZONColor INKS GOOD FOR THE ENVIRONMENT?

Yes, by using AZONColor ink equivalent cartridges, you are helping to protect our environment. Every AZONColor cartridge has been recycled and saved from a landfill. In North America alone, over 350 million cartridges per year are discarded in our landfills, and that number increases by 12 percent annually! Every single cartridge saved from a landfill makes a difference. AZONColor ink cartridges can also be recycled again and again, please visit www.azonequipment.com for details on our recycling program.

Q: CAN I MIX AZONColor INKS WITH MY CURRENT OEM VERSION?

Yes, AZONColor inks have been designed and tested to be “drop in” products. We fully understand that inks are consumed by the printer at different rates of use and for instance, a black cartridge may run out before a cyan cartridge. When your printer signals that a cartridge is low, simply pop-in the AZON cartridge and continue printing. Each cartridge can be replaced as your needs dictate and the OEM aqueous or latex cartridges you are replacing, can be recycled by AZON as well.

Q: CAN I TRUST AZONColor INKS RELIABILITY AND QUALITY?

Not all equivalent inks are created equal; many manufacturers do not put the time and effort into producing high quality equivalent cartridges and inks. The AZONColor brand has been around for decades and is one of the most recognized and trusted names in the graphics business. Our AZONColor inks are manufactured in the United States using the same high quality DuPont pigments and dispersions as the OEM brand. Each cartridge is manufactured under strict ISO 9001 standards, and thoroughly tested and inspected to ensure that it meets the highest standards of quality.

AZONColor INKS - LIMITED WARRANTY

National / AZON Equipment – AZONColor ink products are designed and manufactured to meet or exceed the quality and performance that your printer was originally designed to produce. National / AZON Equipment warrants to Customer that inks and cartridges free from defects in material and workmanship for the period of 180 days from the date of purchase. During the warranty period, National / AZON Equipment will repair or replace, at its option, any cartridges found to have defects in material and workmanship within the scope of the original OEM product warranty. National / AZON Equipment may also at its option refund the price of any defective cartridges that are subject to proper claims during the warranty period. During this warranty period, National / AZON Equipment will replace any ink, which is not manufactured to agreed specifications. Other than these remedies of Customer, National / AZON Equipment disclaims all other warranties whatsoever, either expressed or implied, including all warranties of merchantability and fitness for a particular purpose.

The limited warranty of National / AZON Equipment excludes any damage to the cartridges from excessive temperature of (either hot or cold) pressure, vibration, or storage time. This limited warranty is Customer's exclusive remedy for any defective product shipped by National / AZON Equipment. National / AZON Equipment shall in any event not be liable for any consequential or incidental damages suffered by Customer or Customer's contracting parties.

Through our ink production lot tracking system we're able to offer full trackability of any product we supply. The same system allows us to track production at each of its many stages. All ink cartridges and flush cartridges that we supply have bar code labels clearly showing the batch number linked to all stages of our internal Quality Control and Assurance testing. For those customers requiring a Certificate of Analysis, we're able to offer batch-specific documentation that all pertinent ink characteristics meet design specifications.

COMPATIBILITY AND PRINT QUALITY

National / AZON will specify an ink to be used on a specific printer that will guarantee no damage to the printer's ink system (including filters, ink pumps, tubes, primary and secondary ink tanks and print head). National / AZON will not be responsible for normal wear of filters and print heads and show correct printability on professional specified wide-format substrates, provided that the customer uses the correct printer settings and follows all instructions in the printer manufacturer's user's guide. The customer must notify National / AZON if any machine modifications of any kind have been made to the printer prior to introducing its ink to the ink delivery system.

National / AZON will be responsible if it is found that the ink has caused damage to the ink delivery system. National / AZON keeps a retain from every batch made and can test those retains if a customer has any issues. National / AZON will either give a credit or reimburse the customer for parts of the ink delivery system that need to be replaced and labor. While care has been taken during the development stage of the ink, it is up to the customer to make sure that AZONColor inks are compatible with the existing supplier's product. If the user is in any doubt, National / AZON is able to carry out some initial testing in house to screen for potential problems. In some cases, it is recommended that a complete flushing out of the ink delivery system is undertaken prior to introducing AZONColor ink cartridges (this is in the case of replacing another non OEM ink).

WARRANTY PERIOD

National / AZON believes and stands by the products it manufactures. That is why we offer a warranty on our inks 180 days from the date of purchase. When an ink is changed out of a printer regardless of color the warranty will no longer apply. If a customer would like to switch from OEM ink to our ink during the warranty period for the printer we will warranty the entire ink delivery system, thus covering what the manufacturer will not.

Many printer manufacturers will offer a 1 year warranty on the printers that they build. AZONColor's Warranty will cover the Ink Delivery System for as long as you or your customer uses AZONColor inks. So long as you follow the changeover procedure the warranty will be valid.

PRINTHEADS

Printheads are a consumable part of the printer. National / AZON does not cover the replacement of printheads mechanically damaged by the customer or old printheads that are worn out. All printheads which are claimed to be damaged by AZONColor Corporation's inks must be returned to AZONColor Corporation for full investigation and appraisal.

STORAGE

To maintain the maximum shelf life of AZONColor ink cartridges you should always refer to the product information sheet. It is recommended that our ink cartridges be stored in a cool, well-ventilated area. Storage temperature should be between 40 to 104° F (5 to 40° C). Keep product away from direct sunlight. When stored under these conditions, the inks are expected to have a shelf-life of 12 months from the date of manufacture.

OUTDOOR DURABILITY

National / AZON uses only the highest quality pigments that have been chosen for their excellent color gamut. During our accelerated in house testing using a Dr. Honle light cabinet, the outdoor durability of our eco-solvent inks equates to approximately 24 months outdoor exposure in most moderate climates.

USER GUIDE

For specific user guides or instructions, always refer back to the printer manufacturer.

The information and recommendations contained in this sheet, as well as technical advice otherwise given by authorized representatives of National / AZON, whether verbally or in writing are based on the present knowledge and are believed to be accurate. However no guarantee regarding the accuracy is given as we cannot cover every possible application of our products and because manufacturing methods, printing stocks and other materials vary. For the same reason our products are sold with a warranty which is limited to the replacement value of parts and service and/or the value of ink and on condition that users shall perform their own tests to satisfy themselves that the inks will fully meet their particular requirements.
