WHITE

The green graphic board for signage and display

Falconboard® All White from Hexacomb is a graphic board produced with a SFI** certified white core with white clay-coated facings. It is a green choice over petroleum-based products because it is made primarily from renewable forest resources and is completely recyclable*.

Falconboard® All White is designed for use in interior signage, three-dimensional displays, point-of-purchase applications where excellent print quality and brightness is required.

Falconboard® All White's unique structure can handle the most demanding of graphic display requirements due to its strength, rigidity and dimensional stability.

Falconboard® Print is an excellent green alternative to traditional foam boards made from polyethylene (PE), polystyrene (PS) or polyvinylchloride (PVC).

PERFORMANCE

- Excellent compression strength
- Excellent brightness value
- Highly flat and smooth surface
- High rigidity and dimensional stability
- Lightweight but exceptionally strong
- No additional backing required
- Withstands the weight of heavy products
- Excellent direct printability: bright colors, no "read-through", no topography in images
- Tough core resists denting
- Durable: scratch and warp resistant

VERSATILITY

- Custom sizes available
- Works well with most inks and adhesives
- Works with most commercial connective systems such as edge tape and plastic or metal edging or channels
- Well-suited for a diverse range of applications and fabrication
- Aesthetically pleasing appearance
- Easy-to-use and store
- Use and reuse for multiple functions

SUSTAINABILITY

- Excellent alternative to traditional foam boards made from polyethylene (PE), polystyrene (PS) or polyvinylchloride (PVC)
- Made with SFI** certified, all natural, renewable virgin and post-consumer recycled fibers
- Completely recyclable*
- Renewable and reusable
- Promotes closed loop recycling
- Lessens dependence on petroleum-based resins
- Lessens landfill waste
- Baler friendly
- Recyclable with corrugated waste*
- Increases corporate environmental responsibility and stewardship

Made in the USA

*Check your area's corrugated paperboard recycling policy.

**SFI certification in North America only. Sustainable Forestry Initiative® and SFI® are registered trademarks of SFI Inc.

WHITE

Falconboard meets your demands

- Custom sizes available plus a full range of standard sizes
- Product can be shipped boxed or bulk
- Excellent brightness value
- White edges provide a clean, bright look
- Flat and smooth printing surface to streamline production
- Edging and cutting solutions for the most relevant worldwide manufacturers
- Die cutting solutions available

Falconboard supports creative retail displays

- Falconboard's creative potential and ease of assembling allows the design of original and attractive in-store decorations to get target shopper's attention
- Its superior fabrication and handling capabilities deliver cost-effective and outstanding display, exhibit and signage applications
- Environmentally-responsible material that helps retailers and brands to reach their green initiatives

Standard thickness 1/4", 3/8", 1/2", 3/4", 1", 1-1/2", 2" through 4"

Standard sheet size 48"x 96", 48"x 120", 60"x 96", 60"x 120"

Custom sizes available.

MOUNT

The **green** backing board for **demanding display** applications

Falconboard® Mount from Hexacomb is a paper-based backing board which is structurally engineered for demanding roll media and retail displays. It is a green choice over petroleum-based products because it is made primarily from renewable forest resources and is completely recyclable*.

Falconboard® Mount is designed as a strong, non-petroleum-based option for off-set litho and flexographic printed flexible wide-web materials. Its structural characteristics, strong, flat and rigid, enable improved performance compared to both foam board and corrugated.

Falconboard® Mount is engineered for the strength required for large 3D structures. Its natural kraft liner and core is ideal for temporary and semi-permanent point-of-purchase retail applications.

This unique backing board can handle the most demanding of graphic display requirements due to its high rigidity and dimensional stability

PERFORMANCE

- Excellent compression strength structure
- Highly flat and smooth surface
- High rigidity and dimensional stability
- Lightweight but exceptionally strong
- Durable: scratch and warp resistant
- Improved visual impact underlying cell not visible after lamination
- Withstands the weight of heavy products
- Tough core resists denting

VERSATILITY

- Custom sizes available
- Works well with most inks and adhesives
- Works with most commercial connective systems such as edge tape and plastic or metal edging or channels
- Use and reuse for multiple functions
- Well-suited for a diverse range of applications and fabrication
- Aesthetically pleasing appearance
- Easy-to-use and store

SUSTAINABILITY

BLACK

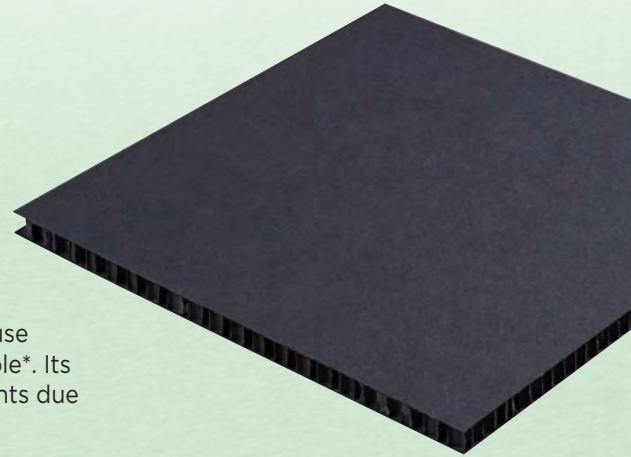

The **green** graphic board for **signage and display**

Falconboard® All Black from Hexacomb is a graphic board produced from a SFI** certified black core with black facings.

Falconboard® All Black is designed for use in signage and POP applications where a truly dark background is required.

Falconboard® All Black is a green choice over petroleum-based products because it is made primarily from renewable forest resources and is completely recyclable*. Its unique structure can handle the most demanding of graphic display requirements due to its strength, rigidity and dimensional stability.

Falconboard® All Black is an excellent option for backdrops in theatrical displays, movie sets, retail exhibits and other applications requiring a dark background.

PERFORMANCE

- Excellent compression strength
- Highly flat and smooth surface
- High rigidity and dimensional stability
- No additional backing required
- Withstands the weight of heavy products
- Excellent direct printability: bright colors, no “read-through”, no topography in images
- Lightweight but exceptionally strong

BUILD

The green graphic board for point-of-purchase applications

Falconboard® Build from Hexacomb is a paper-based graphic display board which is structurally **engineered for demanding three-dimensional point-of-purchase (POP)** applications. It is a green choice over petroleum-based products because it is made primarily from renewable forest resources and is completely recyclable*.

Falconboard® Build is designed as a strong, non-petroleum-based option to display heavier/bulkier products at point-of-purchase. These include **food and beverage products (liquor or soft-drink bottles, heavier food packages); lawn and garden items; consumer electronics; toys and books.**

Falconboard® Build's printing capabilities equal that of foam boards, **including use of wide format, screen and digital printing solutions.** Its unique characteristics allow it to handle the most demanding POP displays and 3D structures due to its high rigidity and dimensional stability.

PERFORMANCE

- Excellent compression strength
- Excellent brightness value
- Highly flat and smooth surface
- High rigidity and dimensional stability
- Lightweight but exceptionally strong
- No additional backing required
- Withstands the weight of heavy products
- Excellent direct printability: bright colors, no "read-through", no topography in images
- Tough core resists denting and allows clean V-cuts for 3D designs
- Durable: scratch and warp resistant

VERSATILITY

- Custom sizes available
- Works well with most inks and adhesives
- Works with most commercial connective systems such as edge tape and plastic or metal edging or channels
- Well-suited for a diverse range of applications and fabrication
- Aesthetically pleasing appearance
- Easy-to-use and store
- Use and reuse for multiple functions
- Its resistance gives designers more creative options compared to foam board, wood and corrugated

SUSTAINABILITY

- Excellent alternative to traditional foam boards made from polyethylene (PE), polystyrene (PS) or polyvinylchloride (PVC)
- Made with SFI** certified, all natural, renewable virgin and post-consumer recycled fibers

The **green** graphic board

Made primarily from forest resources
...recyclable and renewable.

FALCONBOARD®
Stronger. Flatter. Greener. Better.™

The green graphic board for signage, exhibit and display applications

Falconboard® from Hexacomb is a fully recyclable rigid, paper-based graphic media board which offers superior performance over most traditional foam and corrugated options. Its paper-based construction and global production capability makes Falconboard® an ideal solution for your rigid graphic display board needs—regardless of where your business is located.

Falconboard® paper-based products are environmentally-responsible because they are made primarily from renewable forest resources and are completely recyclable*.

Its structural characteristics, strong, flat and rigid, enable improved performance compared to both foam board and corrugated. This unique structure can handle the most demanding of graphic display requirements due to its high rigidity and dimensional stability.

Falconboard's unique structure can handle the most demanding of graphic display applications due to its superior rigidity and dimensional stability. It is also recommended for short-term to semi-permanent interior POP applications as a replacement for traditional wood or foam materials.

PERFORMANCE

- High rigidity and dimensional stability
- Superior beam and compression strength
- Superior fabrication capabilities including table and die-cutting processes
- Highly flat and smooth surface
- Lightweight but exceptionally strong; allows freight and handling savings
- Withstands the weight of heavy products
- Excellent printability: bright colors, no “read-through”, no topography in images
- Tough core resists denting
- Durable: scratch and warp resistant
- No additional backing required

VERSATILITY

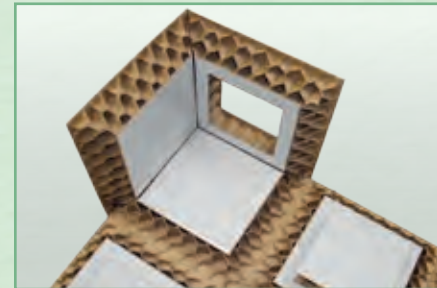

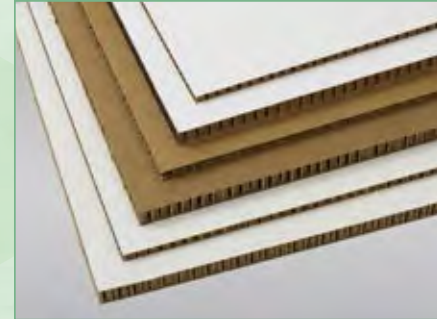

- Custom sizes available
- Product can be shipped boxed or bulk
- Works well with most inks and adhesives
- Works with most commercial connective systems such as edge tape and plastic or metal edging or channels
- Well-suited for a diverse range of applications and fabrication
- Aesthetically pleasing appearance with different finishes: white, natural kraft and black
- Easy-to-use and store
- Use and reuse for multiple functions

SUSTAINABILITY

- Excellent alternative to traditional foam boards made from polyethylene (PE), polystyrene (PS) or polyvinylchloride (PVC)
- Made with SFI** certified, all natural, renewable virgin and post-consumer recycled fibers

The **Falconboard** family of graphic boards

FALCONBOARD PRINT

Falconboard® Print is an excellent “green” alternative to traditional foam boards for interior signage and POP displays. Falconboard’s printing capabilities equal that of foam boards. Major benefits include:

- Suitable for the most demanding of graphic display requirements due to its high rigidity and dimensional stability
- Direct print eliminates the added cost and labor step of mounting
- Excellent brightness and printability

FALCONBOARD ALL WHITE

Falconboard® All White is a graphic board produced with white core and liners for customers who prefer a clean white edge. It is designed for higher-end interior signage, three-dimensional displays and POP applications as sustainable replacement for foam.

- Improved visual appeal and graphic presentation due to white edge
- Excellent brightness value
- Significantly more rigid than foam

FALCONBOARD BUILD

Falconboard® Build is structurally engineered for demanding three-dimensional POP applications to market heavier/bulk products. These include food and beverage products (liquor or soft-drink bottles, heavier food packages), lawn and garden items, consumer electronics, toys, books and more.

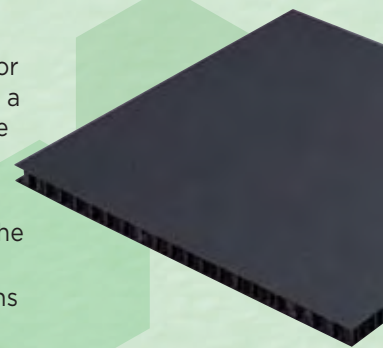

- Its resistance offers designers more creative options compared to foam board, wood and corrugated.
- Tough core allows clean V-cuts for the creation of 3D structures
- Significantly lighter than wood and metal and easier to handle

FALCONBOARD ALL BLACK

Falconboard® All Black is designed for signage and POP applications where a truly dark background is required like outdoor movie promotion, theatre displays and more.

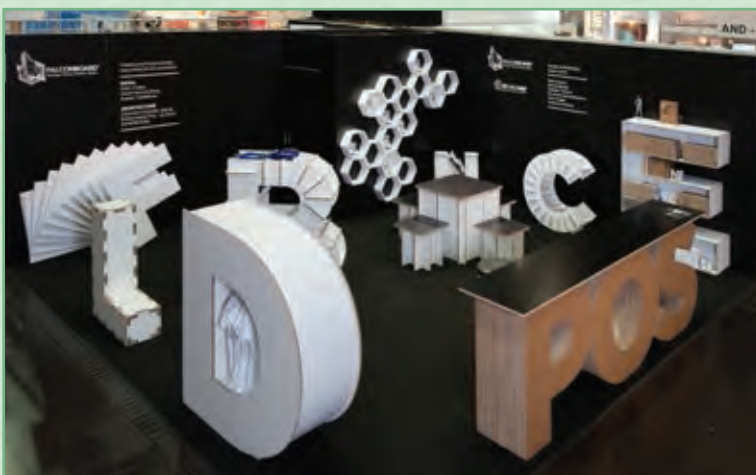

- Superior opacity that brings out the colors of the printed images
- Dark edge reduces edge objections
- Ideal environmentally-responsible replacement for foam boards

FALCONBOARD MOUNT

Falconboard® Mount is a backing board structurally engineered for demanding roll media and mounting requirements as well as for the production of large 3D structures.

- Improved visual impact: underlying cell structure not visible after lamination
- Kraft facing, kraft core provides a natural paper look.
- Used as mounting board it strengthens the resistance of POP displays made of corrugated
