Artcare™ Archival Foamboard

The only foamboard that truly protects your art.

Artcare Foamboard goes the extra mile to actively protect artwork and trap harmful substances that are out gassed by all other foamboards. As this illustration shows, all foamboard naturally gives off a variety of volatile compounds which can visibly damage art. Only Artcare Archival Foamboard is chemically and physically engineered to trap the harmful gases and protect the artwork mounted on it.

Dr. Peter Sparks
Preservation Consultant
Former Director for Preservation
Library of Congress

"It is Important that you know other acid-free foamboards claiming to be "archival" and "good enough" don't protect against the harmful effects of outgassing. Artcare™ Archival Foamboard is the only foamboard I would recommend for conservation framing."

See the visible difference. For protecting artwork, don't settle for less.

Artcare
Archival
Protection

Other "Archival"
Protection

Artcare archival foamboard outperforms all other "archival" foamboards.

Independent studies prove other "Archival" foamboards expose artwork to harmful gases.

This chart above shows the amount of harmful chemicals, including plasticizers, ketones, aldehydes, and solvents, which were out-gassed from other "archival" foamboards in an independent lab test. Only Artcare Foamboard with MicroChamber technology absorbs and neutralizes these gases, keeping them away from the art.

	Artcare™ Archival Foamboard	Other Conservation Foamboard
Protects artwork from harmful effects of foam outgassing	YES	NO
Protects against damaging pollutants from the environment	YES	NO
Acid-free and lignin-free liners	YES	YES
Buffered to maintain alkaline pH	YES	YES
Works optimally with the Artcare Archival System	YES	NO

Artcare™ Archival Foamboard

Not all foamboard is created equal. Artcare™ Archival Foamboard from Bainbridge® is the only one that's truly archival. Other foamboards offer an archival surface, while the foam itself gives off gases that can fade, damage and deteriorate your customers' artwork. But Artcare, with its MicroChamber® technology, absorbs and neutralizes those harmful gases and protects the art well into the future. Plus, our opaque, lightly textured surface papers eliminate show-through and feature a soft white or black color that is suitable for floating applications. Available in White, Black, and 100% cotton rag surface.

Heat-activated drymount boards

Artcare™ Restore™

An archival heat-activated foamboard that allows art to be reversed to its pre-mounting condition. The non-permeable adhesive meets all archival standards and can be completely removed from the art. Artcare™ Restore's breakthrough adhesive activates at low temperatures, 150° – 170°, and short dwell times, making it safe for most art. You can mount art in just 15-30 seconds on a mechanical press—or as little as 2 minutes in most vacuum presses.

Part Code	Width	Color	Size	Quantity
ACRS3240.3C	3/16"	White	32 x 40	25
ACRS4060.3C	3/16"	White	40 x 60	25

Be sure to place an Artcare Restore removal sticker on the back of your mounted art board to identify use and provide instructions for simple removal.

Artcare™ Restore™ Foamboard

This artwork has been mounted with care on Bainbridge Artcare Restore archival foamboard. It can be safely reversed to its pre-mounted condition by following these simple steps.

1. Place in heat press (30 seconds/150).
2. Slip rounded edge art removal tool under corner of art.
3. Slide tool under the art so the bottom 1" is lifted from board.
4. Place bevel cut 4-ply matboard under the lifted edge of the art.
5. Slide matboard under the art evenly until the art is removed.
6. Use cotton gloves or brush to completely remove the small amount of adhesive from the artwork.

Custom Framed At _____

Date _____

Artcare™ Restore Mounting Tips

1. PRE-DRY Art to Remove Excess Moisture

Place the art between absorbent sheets or kraft paper in a closed, but not locked, heated press for 15 seconds to dry prior to mounting. Dry art creates the smoothest bond.

2. Temperature Range

The temperature range for Artcare Restore is 150°-170° depending on the size and thickness for the art being bonded. You may need to increase the temperature - up to 170°F - if your heat press is not accurate or calibrated properly. Artcare Restore should not be used at temperatures above 170° F.

3. Dwell Time in Press

Artcare Restore mounts in 15-30 seconds. Most items will readily bond at the lowest time and temperature. However,

oversized or thicker pieces, such as heavy weight posters and fabrics, or using release board instead of release paper may require longer dwell times up to 2 minutes. (Note: with a vacuum press, the dwell time must be added to the vacuum draw time.) **It is always safer to increase the dwell time first, and then increase the temperature if necessary.**

4. Cool Under Even Weight

Removable adhesive products such as Artcare Restore bond as they cool. Cooling your mounted artwork under glass ensures a uniform and strong bond.

FOR MORE INFORMATION CALL 888-846-6847

SpeedMount® Foamboard

SpeedMount makes dry mounting faster than ever, giving you more time to spend with customers and less time mounting. SpeedMount works in just seconds and bonds at temperatures as low as 150°. The ultra smooth coating makes it a perfect surface for mounting everything, including photographs, posters, and decorative papers.

Part Code	Width	Color	Size	Quantity

SpeedMount® Foamboard

Fast! SpeedMount Heat-Activated Foamboard now makes dry mounting your artwork quicker than ever. You can mount paper art in just 15 seconds using SpeedMount and your mechanical press — or as little as 2 minutes in most vacuum presses! **Simply size, tack and mount!**

Easy to Use! Pre-coated on one side with a new technologically advanced, heat-activated adhesive that is permanent, dry and tack-free. It is breathable and may be used for all types of mountings from porous paper to non-porous resin-coated (RC) photographs. Perfect for production and poster shops where mounting needs to be clean, fast and effortless. In addition, if removal is necessary, mountings can be removed easily with a heat gun or hair dryer!

Ultra smooth! The ultra smooth adhesive coating makes SpeedMount an ideal surface for mounting photographs. This smoother surface and lower recommended temperature give greater control over the dreaded "orange peel" effect, also making this a great mounting surface for thin posters, magazine pages and newsprint!

Low Temperature! This heat-activated dry mount foamboard may be used at 150° - **the lowest mounting temperature recommended in the industry today.** Although SpeedMount is versatile in that it bonds at all temperatures between 150° and 190°, selecting lower temperatures limits adhesive absorption and makes dry mounting safer for many items. Some projects may require higher temperature settings and/or longer dwell times to

FABRICS & TEXTURES

2015

Artcare™ Age-Defying Protection

Artcare products feature the patented MicroChamber® technology that provides a preventative conservation protection unavailable with other matboard. A unique combination of zeolites and buffers traps and neutralizes oxidizing gasses, other pre-acidic gasses, and degradative by-products – giving Artcare boards the ability to actively protect art and photographs against attack by external pollutants and internal vices.

Museum Quality Protection

Only Artcare offers active preservation for treasured art and photographs that your customers will value forever.

	Artcare™ Archival Matboards	OTHER Conservation Matboards
Slows art and paper degradation	YES	NO
Neutralizes acid by-products	YES	NO
Protects against damaging pollutants	YES	NO
Acid-free and lignin-free	YES	YES
Fade and bleed resistant	YES*	YES*
Buffered to maintain alkaline pH	YES	YES

* Bainbridge audits every production lot to ensure conformance to industry standards for optimum fade and bleed resistance. Not all conservation matboards meet these stringent standards. Does not apply to fabric surfaces.

See the Artcare Difference

**Artcare™ Archival
Protection**

**OTHER
Archival Protection**

In independent lab tests, the images above were exposed to concentrated doses of nitrogen dioxide, the most common air pollutant. Both were tested in the same testing chamber for the same length of time. Neither were exposed to light during testing. The results prove the proactive performance of the Artcare Archival System.

Library of Congress study proves effectiveness of Artcare Technology

- The zeolite in Artcare **absorbs pollutants** more effectively than rag board without zeolites. Artcare boards outperform traditional museum board.
- Artcare boards **trap and hold** pollutants better than any other archival board
- Library of Congress tests prove that Artcare works in **real-world** air pollution concentrations

Alphamat® Artcare Technical Specifications

Furnish:

100% virgin alpha-cellulose fiber which meets the most stringent standards for stability and permanence. Tests conducted in accordance with TAPPI Method T-236 om-85 / ISO 302 indicate the board to be free of groundwood and lignin.

pH value:

An alkaline pH of 8.9 +/- .4 indicated using TAPPI Method T-509 om-88 cold extraction on slurried pulp.

Buffer:

Alkaline reserve of 3-5% measured by ANSI IT9.2-1991 Sec 5.2.

Molecular Traps:

Contains molecular traps synthesized specifically for adsorption of air pollution gasses and degradative by-products of artwork, photographic media and wood mouldings.

Lightfastness:

Fade resistance established using a Xenon Fadometer in accordance with ASTM D3424. Alphamat colors exhibit less than 2.5 point brightness shift.

Bleed Resistance:

No bleed visible after 48-hour submersion using method FACTS EXPMMB-2000 Sec.10.03.

Resistance to Aging:

Samples tested in air circulation oven for 12 days at 100°C and for 10 days in temperature humidity chamber at 100°F and 90% relative humidity. All board components remained unchanged in appearance and strength.

Sizing & Adhesives:

Water-based alkaline adhesive with no solvents is used to adhere component parts of Alphamat boards.

Meets quality standards set by the
Fine Art Trade Guild

Alpharag Artcare

Made from 100% pure cotton pulp, featuring top to bottom cotton fiber, and subject to the most rigorous quality controls, Alpharag Artcare meets or exceeds all industry standards for paper permanence. Alpharag Artcare incorporates the patented and proven MicroChamber® technology to actively protect art and photos from airborne pollutants and acids, thereby offering a preventative conservation protection unachievable with any other rag product.

ADDITIONAL ARTCARE ARCHIVAL PRODUCTS – To protect art and photography with the very highest level of conservation available, use the complete package of Artcare Archival products.

ALPHAMOUNT® ARTCARE™

Alphamount Artcare is a pure alpha cellulose mounting board that offers superior rigidity and a surface that is ideally suited for hinges and corner pockets.

White
8732 2 ply 32" x 40"
8734 4 ply 32" x 40"

ARTCARE™ ARCHIVAL FOAMBOARD

Artcare™ Archival Foamboard is the only one that's truly archival. Artcare, with its MicroChamber® technology, absorbs and neutralizes those harmful gasses and will protect the artwork for years to come.
