BANNER UPS®
ADHESIVE GROMMET TABS

THE QUICK, STRONG, AND INEXPENSIVE ALTERNATIVE TO GROMMETS

- Make your own banner blanks instantly. No special tools required.
- Stronger than grommets because they spread the stress of high winds over a much larger surface area.
- *WIND TUNNEL TESTED.* Banners made with Banner Ups® withstood sustained winds of 70+ miles per hour!
- Sticks to virtually all common banner media including scrim vinyl, Tyvek®, polyethylene, polypropylene, Foamcore®, Coroplast®, and many others.
- Banner Ups® have 1001 uses. They can be used any time you need a fastener for fabric or film.
- See amazing video - www.bannerups.com.

BANNER UPS® ARE AVAILABLE IN THREE STYLES:

Regular - BAN001

For your heavy-duty outdoor needs.

Mini - BAN002

For light duty outdoor or indoor use.

Mini Clear w/ Backtab BAN003

Sticks directly to wall or window.

BANNER UPS® ARE EASY TO USE:

Peel liner from adhesive.

Apply adhesive to one side of banner corner.

Fold and apply adhesive to other side of corner and press firmly.

HDPE
RECYCLABLE

BANNER UPS® USES:

Rope through loop.
(for indoor)

Rope through center hole.
(for outdoor)

Use with Foamcore®, Coroplast® and poster board.

Use Banner Ups® along edges for more support.

Make P.O.P. displays.

Even works where grommets won't.

HERE'S WHAT OUR CUSTOMERS SAY ABOUT BANNER UPS®...

"I love Banner Ups! I live in Oklahoma (very windy) and I could not do the job without Banner Ups. I work in the beer business and I hang banners and signs every day. Banner Ups are the only product that lasts in the market. They are tough as nails with wind!!! So, thank you Banner Ups!!!"

-Amber F.
Oklahoma City, OK

BANNER UPS®

POWERTAPE

HEM REINFORCING TAPE

IMPROVED

B.C.I. IMAGING
www.bciimage.com
866 971-1008

REINFORCE BANNER EDGES WITHOUT FOLDING OR SEWING A HEM

- NEW Stronger adhesive at a lower cost!
- Single-sided super-strong tape. No need to sew or fold hem!
- Create super-strong banners of any length in a few minutes!
- Much easier, faster, and stronger than ordinary double-sided banner hem tape.
- Less "roll wrinkle" and reduced edge curl.
- Fabricate a mighty banner in only 3 minutes!
- See amazing video - www.bannerups.com.

POWERTAPE® IS EASY TO USE:

Apply Banner Ups PowerTabs®

Apply PowerTape® along top and bottom edge on back of banner

Punch hole

POWERTAPE® TIPS:

- Recommended for outdoor banners of 6 feet or more in length.
- When used with *PowerTabs®* apply tab first. *PowerTabs®* will not stick over *PowerTape®* because the tape has a silicone release coating.
- Apply light tension to banner for easy application.
- Position 1⁄8"–1⁄4" from top and bottom edge to allow for some tape wander.
- *PowerTape®* may be used along sides of vertical banners to reduce edge curl.

HERE'S WHAT OUR CUSTOMERS SAY ABOUT POWERTAPE®...

"Your product does everything you advertise it will. I had a large, very expensive banner and the metal grommets ripped out. I was seeking a good solution for repairing it. The adhesive backed grommets [PowerTabs] and repair tape [PowerTape] did a fabulous job! We live in an area that is practically a wind tunnel [with] the Santa Ana or 'devil winds' - very hot dry winds with gusts up to 70 miles per hour. Your product held up very well and I'm sure my banner will give me several more years of service. Would not hesitate to reorder!"

NEW!

MEGATAPE

HEM REINFORCING TAPE

DOUBLE SIDED VERSION OF POWERTAPE®

- Even greater strength than traditional *PowerTape®* (withstood winds of 98+MPH in wind tunnel tests!)
- Produces a fold-finished banner edge for customers who prefer that look.
- Easy to apply. Wears like steel!
- Much cleaner appearance and twice as strong as ordinary double-sided banner hem tape.
- May be used for double-sided banners. Since the hem is folded, the tape is hidden inside.

NOTE: *MegaTape®* is not recommended for making pole pockets or for splicing banner media. For these applications we recommend Banner Ups *PoleTape®*.

MEGATAPE® IS EASY TO USE:

Apply MegaTape® to back side banner edge

Remove liner and fold banner edge

Apply PowerTab® or grommet or both

MEGATAPE® TIPS:

- Use where folded edge is desired, or on double-sided banners.
- Use where ultimate strength is needed.
- Use with *PowerTabs®*, or grommets, or both.
- See amazing wind tunnel test at www.bannerups.com.
- Visit www.bannerups.com for installation tips and instructional videos.

MegaTape® withstood winds of over 98 MPH! Scan here to watch video.

BANNER UPS

POWER PUNCH

NEW!

THE PERFECT PUNCH FOR MEGATAPE®

Add punch to your banner fabrication and save time with the new *PowerPunch®*! *PowerPunch®* cuts cleanly through tabs, *MegaTape®* and banner media with ease. Lightweight, portable and easy-to-handle, but its performance is heavy duty.

- Sell tabs and punch and let your customer make the banner.
- Perfect for instant banner producers!
- Available individually or in prepackaged *PowerTabs®/ MiniPunch®* DIY Banner Making Kit.

HERE'S WHAT OUR CUSTOMERS SAY ABOUT OUR PRODUCTS...

"I've been using [Banner Ups] products for many years and always thought they were the greatest idea for quick economical banner finishing. They couldn't be easier. I love how I don't need lots of equipment to achieve a durable product."

-Kevin, Orlando, FL

TIPS & TRICKS

- When using *PowerTabs®* and *PowerTape®* apply tabs first, then tape.
- Always apply *PowerTape®* across the entire length of the top and bottom edges of the banner over the top of the *PowerTabs®*. Running the tape only part way will not achieve full strength.
- It is normally not necessary to use *PowerTape®* on all four sides of banner, but if you want to do so you must dissolve the tape's silicone coating before overlapping at corners. To do so use nail polish remover (acetone) on a soft cloth and rub the glossy surface for about 10-15 seconds, then wipe dry. The surface will be dulled and the overlapped *PowerTape®* will adhere. Finally, punch hole through overlapped tape, *PowerTab®*, and banner media using a *PowerPunch®*.
- For best results, when using *PowerTape®*, roll finished banner with the print side out in a large diameter roll (6 inches or more).
- To prevent *PowerTape®* (or any adhesive roll) from sticking together or to tabletops, dust the sides of the rolls with common talcum powder or corn starch.
- When using *MegaTape®*, apply tape first, then fold banner edge, then apply tabs.
- DO NOT use *MegaTape®* to make pole pockets. Instead we recommend *PoleTape®*.
- For best results when cutting *PoleTape®*, fold the liner side of the tape back on itself then cut with a razor style letter opener. To avoid sticking, lubricate razor before cutting (furniture polish works great!).
- For more tips visit www.bannerups.com.

FREQUENTLY ASKED QUESTIONS

What is the difference between Banner Ups® and *PowerTabs®*?
A. Banner Ups® are made of a thick standard grade plastic with foam adhesive designed for hard-to-stick-to surfaces. *PowerTabs®* are made of a a thin, flexible, highly engineered film and adhesives that are designed to work together with *PowerTape®* to produce even greater strength, especially on larger banners. *PowerTabs®* also have a corner-friendly shape and come on a convenient easy peel liner. *PowerTabs®* are available in white and clear for digital color banners.

How do I decide which *PowerTabs®* products to use?
A. -For indoor or light duty outdoor banners, use *Mini PowerTabs®*.
-For outdoor banners up to 6 ft. in length, use four Large *PowerTabs®* at the corners (with rope going through the center hole).
-For banners over 6 ft. use Large *PowerTabs®* at the corners and add *EdgeTabs®* every 2-3 ft. along the top and bottom edges, then apply *PowerTape®* along the top and bottom edges of the back of the banner.
-For ultimate strength, use *MegaTape®*, fold edge, and apply *PowerTabs®*, placing rope through the center hole.

Should I apply *PowerTabs®* or *PowerTape®* first?
A. Always apply *PowerTabs®* before *PowerTape®* as the tabs will not stick to *PowerTape®*. If using *MegaTape®*, apply the tape first, then fold edge and apply *PowerTabs®* last.

Should I apply *PowerTape®* along all four edges?
A. This is not necessary. We recommend that you install *PowerTape®* along the two long edges of the banner, as they absorb more stress. If you want to use *PowerTape®* on all four sides, please see special preparation instructions on the previous page.

Can I use grommets with *PowerTabs®* or *PowerTape®*?
A. Yes. In most cases it won't be necessary because *PowerTabs®* are much stronger than grommets, especially when used with *PowerTape®* or *MegaTape®*. However, our customers frequently mix and match our tabs and tapes with grommets to achieve the desired results.

How long will Banner Ups® products last outdoors?
A. Our products are designed to withstand rugged outdoor conditions for several months. Some customers report banners lasted over a year!

Can I use *MegaTape®* to splice banner media or to make pole pocket banners?
A. NO. Only *PoleTape®* is designed for this application.

WHAT CUSTOMERS SAY ABOUT...

BANNER UPS®
ADHESIVE GROMMET TABS

"Banner Ups has made hanging our media a 'piece of cake'. The metal grommet and ancient grommet machine are a thing of the past. The best thing about Banner Ups is the ease of installation. Our salesmen are actually hanging banners now! We know if we hang our banners for a week-long event with Banner Ups they are going to stay up. Our competitor is going crazy because we won't tell them where we buy them."

-Craig G.
Rockford, Illinois

"In the future, I am going to use PowerTabs for all my banners of 8 feet or more at no charge to my customers. A mad customer (at failed grommets) is not worth the small cost I pay for PowerTabs."

-Gregg S.
San Diego, California

"I would not sell a banner without Banner Ups PowerTabs."

-Troy L.
Sun Valley, Idaho

"I made a banner for my son's football team with PowerTabs and PowerTape. Another father...claimed his banner was better because it had grommets. That very same day, a thunderstorm came through and his banner came right down. You don't have to sell me on PowerTabs and PowerTape!"

-Vince T.
Toronto, Ontario

"Your products were recommended to us by another company. Holy cow! What a difference it made for our digital banners. We were struggling with creasing and wrinkling when we grommeted our digital banners. [Your] products have eliminated that problem. Whether we use them in conjunction with grommets or by themselves they have made our lives so much easier!"

-Chris M.
Webster, New York
