430 - 20LB Engineering Bond

Our production bonds are extensively tested for performance. As compared to competitive grades ours provide excellent toner adhesion and dense image on a smooth bright white background. Our 430 Engineering bond is 92 bright and comes on a 3" core with the Imaging Side Out. Also available in 24lb, see product 435.

433 - 20LB Recycled Engineering Bond

Dietzgen recognizes the many benefits of using recycled engineering bond paper. Although the cost is marginally higher, the benefits range from conserving energy, reducing solid waste, decreasing pollution, improving the quality of waste water reducing pressure on the forests and the environmental impacts of commercial forestry, and improving health standards. Our 433 product comes on a 3" core and Imaging Side Out.

471 - 20LB Engineering Vellum

All Dietzgen Vellums are formulated for optimum imaging quality and reliable transport properties through your equipment. They exhibit excellent drafting characteristics as well as exceptional strength and durability for repeated handling. Dietzgen Vellums can be used to create high quality, archival intermediates that will not yellow or fade. Our 471 Engineering Vellum comes on a 3" core with the Imaging Side Out.

500 - Gloss Select Poster Paper for Latex/UV

Our Gloss Select Poster Paper is a photo realistic poster paper manufactured with a smooth superior finish. Select Poster was designed and created to be printed with latex inkjet printers. The fine smooth face provides an excellent surface for latex inks. When printed with latex, the image color will pop because of the higher gloss surface. This gloss version of Select Poster is more suited to photo type applications because of the higher gloss.

501 - Satin Select Poster Paper for Latex/UV

Our Satin Select Poster Paper is a photo realistic poster paper manufactured with a smooth superior finish. Select Poster was designed and created to be printed with latex inkjet printers. The fine smooth face provides an excellent surface for latex inks. When printed with latex, the inked portion and the un-imaged portion retains the same low glare gloss levels for pleasing images and graphics. This satin low glare is the perfect product for in-store POP, or informational signage because the image will not be washed out with bright lights, and still retain the color pop required for those applications.

200 FT Rolls
