

TRIANGLE®

The Triangle logo is a registered trademark of Triangle Coatings, Inc. used under license.

TRIANGLE®

INX Digital is happy to provide you with our new 2013 TRIANGLE® Alternative Inks catalog. Within these pages you will find a complete listing of all TRIANGLE® products, grouped by market segment (Wide Format, Superwide Format, UV Curable, Liquid Laminate). In an effort to reduce confusion, we also include the compatibility of each ink to specific equipment types as well as electronics. Need order codes, color availability, packaging information?

It's all included per product!

TRIANGLE® brand is the global leader of alternative inks. This status has not been reached without the help of dealers and distributors such as yourselves. INX Digital relies on our channel partners to embrace the TRIANGLE® brand and beliefs and match them against OEM products daily in the marketplace. It is with the support of our channel partners we continue to make strides forward with new, innovative, quality products and gain market share globally.

Thank you for being an integral part of the success that TRIANGLE® has seen and will continue to see. With an unsurpassed Global Dealer Network we will all continue to profit from our partnerships.

PRODUCT AVAILABILITY

As a truly global company, INX Digital offers services and manufacturing with its operations located in the United States (USA), Italy (IT), Czech Republic (CZ). All products included in this version of the catalog show availability per manufacturing location represented by a green dot (in stock), yellow dot (special order), or red dot (not available).

COLOR COMPATIBLE

Look for our new color compatible logo on our products. Our Triangle brand continues to launch more color compatible products. We have set a new standard internally for color compatibility with OEM profiles. When you see this logo on our literature or label you can feel at ease that we have raised the bar on simplicity for changing to a Triangle product.

CHEMICALLY COMPATIBLE

We are also looking to make your changeovers to Triangle branded products easy with chemically compatible products. We have developed a new series of tests to assure that our products are forward compatible (our cartridge being inserted after the OEM) and backward compatible (the OEM ink being reloaded over our ink). This allows our users to feel a reduced risk in trying our inks.

REACH

INX Digital has successfully completed a major portion of its strategic objectives for complying with REACH relative to the phase-in substance pre-registration period that has now expired. We have evaluated and accounted through extensive supply chain discussions the REACH level substances. There are multiple scenarios that can exist in this supply chain, and multiple solutions are implemented to secure our product line portfolio for our customers.

2-YEAR DURABILITY

Outdoor durability for the purpose of this statement is defined as no appreciable visual deterioration of the printed image when viewed from its intended viewing distance. These inks, TRIANGLE®'s premier outdoor durable inks designed to withstand outdoor exposure for up to two years, are backed by our original Worldwide Outdoor Durability Warranty for TRIANGLE® inks. See warranty for complete details.

1-YEAR DURABILITY

Our one-year durable products are intended for short-term outdoor graphics and are expected to last up to one year depending on ambient conditions. To better match the needs of specific markets, certain TRIANGLE® inks are now available in a one-year durability level. These inks are for use with outdoor graphics that will not be outdoors for more than one year.

SPECIAL ORDER

Special order items are denoted by a star. These items are non-stocked at one or more facilities and will require additional time for delivery. Extended delivery times of 3-6 weeks can be expected from the date INX Digital receives the order.

INX DIGITAL COMPANY

EXPERIENCE AND INNOVATION

100+ YEARS OF HISTORY AND \$1.1 BILLION REVENUE

With more than a century of history, Sakata INX has always been on the forefront of expanding its involvement in the printing and information industries, as well as taking an active approach to new businesses as an ecological-orientated company. Through its global network of companies, that includes INX International Ink Co., the Sakata group is a key player in manufacturing and developing ink solutions for newspapers, packaging, graphic arts and many other heavy-duty productions and critical applications.

A GLOBAL PLAYER COMMITTED TO DIGITAL

JETTING STUFF IS OUR CORE BUSINESS

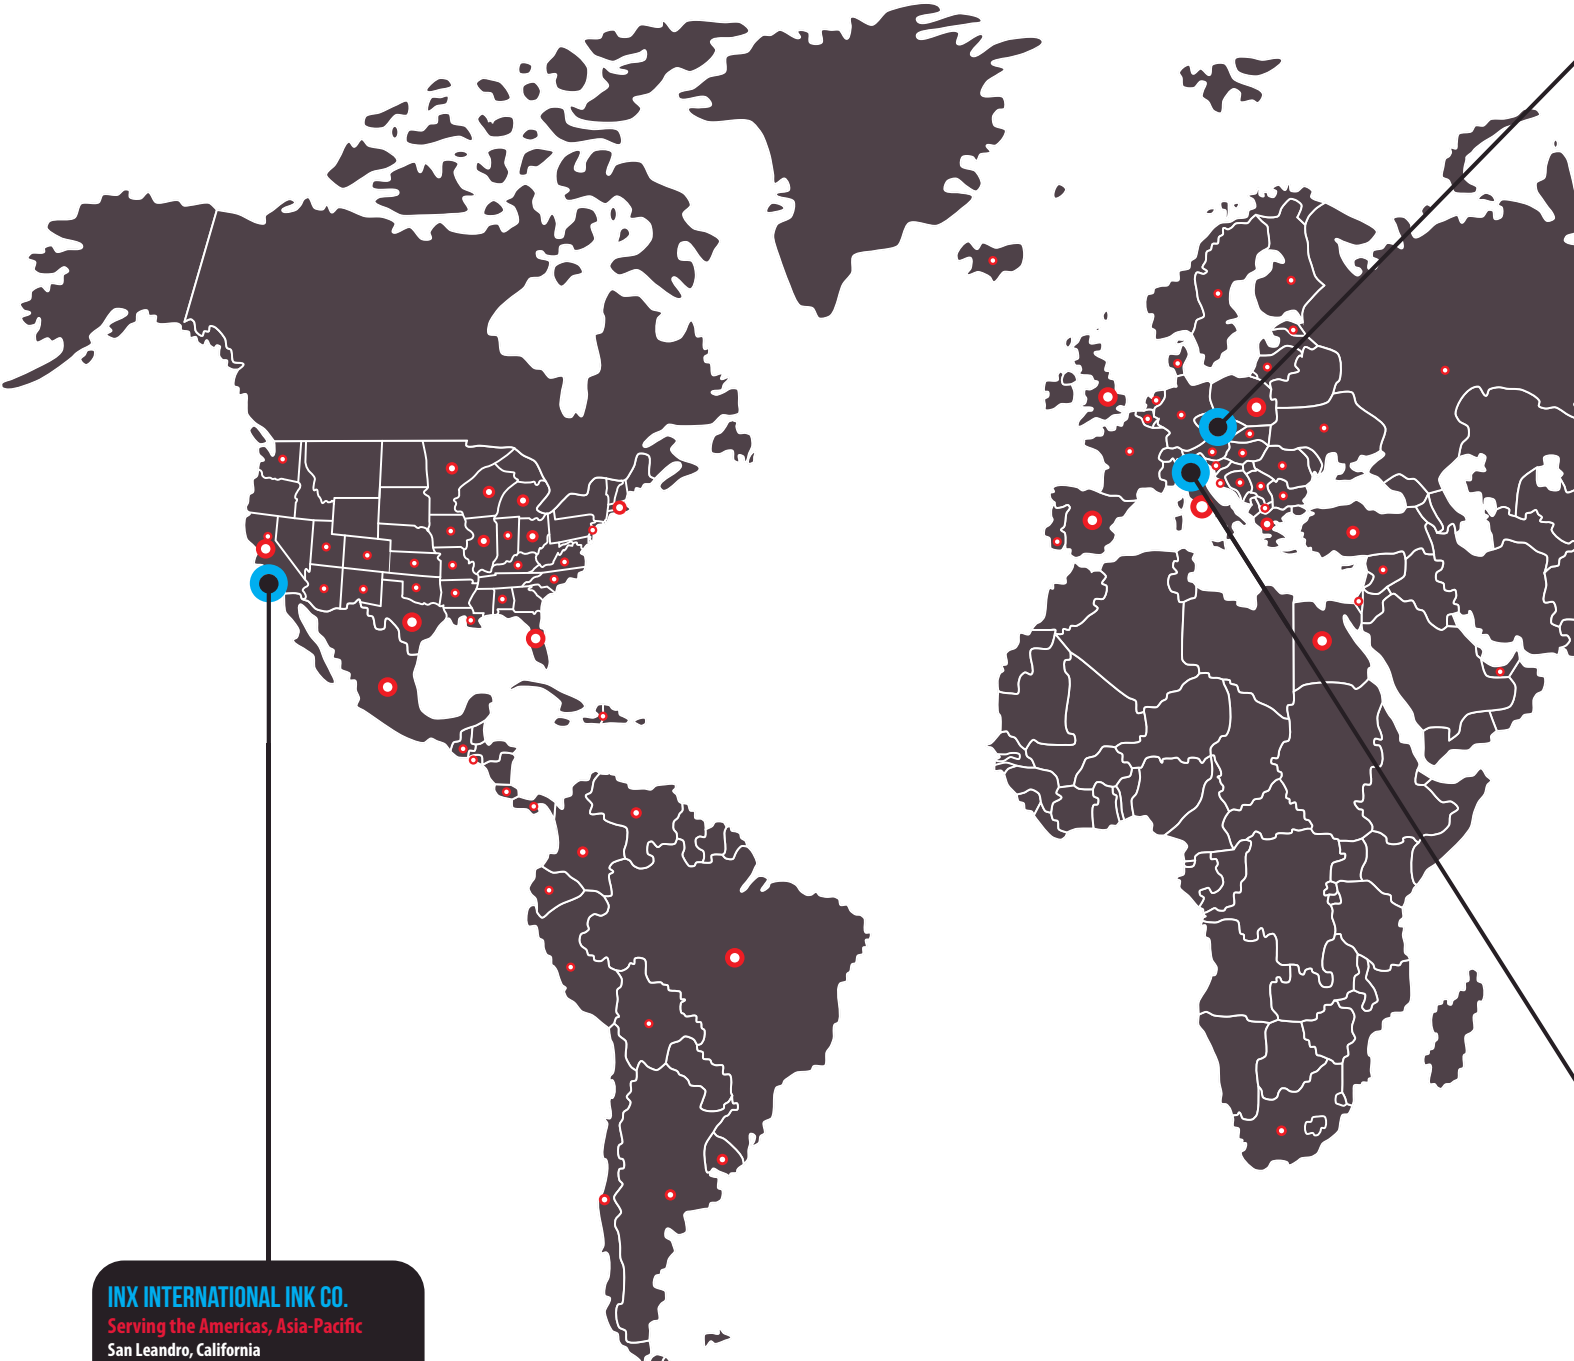

INX Digital is a leading global manufacturer of inkjet inks for wide format, superwide and new generation digital printers, and a supplier of printing parts and related services. As the digital arm of INX International Ink Co., it offers a full palette of digital ink systems, advanced technologies and integrated services including chemistry, hardware and software, engineering design and integration.

INX DIGITAL IS GREEN

ENVIRONMENTAL PROTECTION IS A PRIORITY FOR THE CONSERVATION OF PRECIOUS NATURAL RESOURCES AND THE CONTINUED HEALTH OF OUR PLANET. INX DIGITAL RECOGNIZES ITS RESPONSIBILITY AS A GLOBAL CITIZEN AND IS CONTINUALLY STRIVING TO REDUCE THE ENVIRONMENTAL IMPACT OF THE WORK WE DO AND THE PRODUCTS WE CREATE.

INX DIGITAL AND THE GLOBAL ENVIRONMENT

INX Digital takes pride in its history of innovation and thoughtful design. But technological leadership goes beyond what's in our products. How we impact the environment is also important to us, and environmental considerations are an integral part of INX Digital's business practices. From the earliest stages of product design through manufacturing, use and recycling, we take care to keep our activities and our products environmentally sound. Four areas of particular attention are product and packaging design, responsible manufacturing, energy efficiency, and recycling. Each aspect of the design cycle provides significant challenges, yet our efforts in these areas have resulted in some impressive results.

PRODUCT AND PACKAGING DESIGN

It all begins here. Reducing the environmental impact of our products starts with the product design. Design dictates the quantity of raw materials, type and recyclability of materials, methods for manufacturing and use, and the ease of recycling or disposing.

BIOINX PRODUCT DESIGN

INX Digital's Bio line utilizes renewable resource content. Reducing our reliance on non-renewable resources such as crude-based products drives our business toward sustainability. We believe that constantly driving towards more sustainable business practices and sustainable products is not only important but part of our moral responsibility. Our Bio line utilizes a corn-based raw material. It is also extremely important for the environment for products to have a long useful life and to meet customer demands for their end uses. Our Bio line carefully balances the long-term needs and stability of the product while maximizing sustainability.

SHADES OF GREEN

Shades of Green is a concept that we developed at INX Digital where we look at constant improvement. We believe that one does not suddenly "become Green" but rather that one must constantly strive toward reducing ones impact on the environment. One must constantly become greener.

GREENINX.COM

CE. REUSE.
CYCLE!

BE GREENER

Environmental protection is a priority for the conservation of precious natural resources and the continued health of our planet. INX Digital recognizes its responsibility as a global citizen and is continually striving to reduce the environmental impact of the work we do and the products we create. Please join us in this effort; take advantage of our free recycling program today!

REDUCE LANDFILL WASTE

- ▼ In North America alone over 350 million cartridges are sent to landfills annually
- ▼ Plastics used in cartridges can take over 1000 years to decompose

REDUCE RESOURCES USED

- ▼ Recycling ink cartridges uses up to 80% fewer resources than a new cartridge

*RECYCLE TODAY!

triangleINX.com

*The INX Digital recycling program is currently only available in the continental USA.
All TRIANGLE® and/or OEM cartridges are accepted.

RESEARCH & DEVELOPEMENT

TRUE SOLVENT

Our TRIANGLE® brand of True solvent inks are formulated as industrial, cost-effective production inks. These inks are vinyl polymer-based with a high-solubility solvent system allowing the ink to penetrate into the substrate creating unparalleled adhesion and durability. They are formulated with commodity solvents with good price structure. We have developed XJS800, our own specialized pigment dispersion technology designed around automotive pigments. These nanoparticle submicron pigments are automotive grade and encapsulated in customized polymers for incredibly reliable and stable formulations. These inks are specially formulated for fast dry times yet with enough open time to not cause surface cure in the nozzle orifice. We are known for our bright yellow, strong cyan, wide-gamut magenta and jet four-color blacks.

ECO SOLVENT

Our TRIANGLE® brand of Eco solvent inks are formulated with special attention to environmental impact, human health and safety, and regulatory concerns. INX Digital has set the standard on Eco inks. We have internally set criteria with which we grade every Eco ink. These criteria include odor, Hazardous Air Pollutants, reproductive toxicity, non monogenic, VOC, Environmental Fate and OSHA Threshold limits. TRIANGLE® Brand Eco Solvent inks have extremely low odor. We use our internally designed XJS950 dispersion line, which has a particularly narrow particle size distribution. This consistency of particle shape and size allows consistent drop formation and a reliable meniscus reaction. The custom polymers designed for our Eco line is carefully made and classified to have a narrow molecular weight distribution. The solvent mixture is carefully balanced to optimize polymer solvency, creating a high level of formulation stability.

60%

50%

BIO SOLVENT

Our TRIANGLE® brand of Bio products utilizes renewable resource content. Reducing our reliability on non-renewable resources, such as crude-based products, drives our business toward sustainability. We believe that constantly driving toward more sustainable business practices and sustainable products is not only important but part of our moral responsibility. It is also extremely important for the environment for products to have a long, useful life and to meet customer demands for their end uses. Triangle's Bio product line carefully balances the long-term needs and stability of the product while maximizing sustainability.

MILD SOLVENT

Our TRIANGLE® brand of Mild solvent products are cyclohexanone-free, have reduced odor and yet have a solvency package that still allows for the use of vinyl copolymers that give excellent outdoor durability and are scratch and alcohol resistant. These Mild solvent inks have excellent adhesion characteristics to a wide variety of media and generally have a fast dry rate.

WATER BASED

Our TRIANGLE® brand of water-based inks are dye or pigment based and designed for use on receptive media with a micro-porous surface that is highly absorbent of the ink. Although dye-based inks result in brighter, more vibrant colors, pigmented inks offer a greater resistance to UV light, translating to greater resistance to fading when exposed to sunlight. Most water-based inkjet inks are not waterproof, making a treatment with a laminate or other protective coating necessary.

UV CURABLE

Our TRIANGLE® brand of UV Curable products are formulated to meet a variety of machine-specific applications. These industrial, production inks use our internally designed XJS350 dispersion line that boasts strong, bright, vivid colors. Additionally these automotive-grade pigments have excellent colorfastness (outdoor fade resistance) and a particularly narrow particle size distribution. The small particle size aids in ultimate up time for your printer with consistent drop formation and fewer dropouts caused by air entrapment in the piezo channel. We utilize a variety of monomers as well as integrate unique polymer technology that gives the TRIANGLE® brand of UV Curable products unique performance on a wide variety of media.

INK TRAIN

WARRANTY FOR TRIANGLE INK

WHAT INX DIGITAL WARRANTS

INX Digital's Ink Train Warranty is granted by INX Digital to the original purchaser of Triangle® inks manufactured by INX Digital and to the end-user if the inks were purchased through an authorized member of Triangle's® Global Dealer Network. INX Digital warrants that their Triangle® inks, when properly used in accordance with the terms and conditions of this Warranty, shall not cause damage to the ink train of the printer of their intended use. "Ink Train" for the purpose of this warranty is defined as the wetted parts of the printer, to include the filters, dampers and print heads.

GUARANTEE AGAINST PERFORMANCE FAILURE

In the event that the Triangle® inks manufactured by INX Digital fail to perform as guaranteed in this warranty, INX Digital and/or its authorized agent or distributor will replace the damaged wetted parts of the printer (or issue a credit for this component where, at INX Digital's sole discretion, replacement is not reasonably possible).

All statements, technical information and recommendations about INX Digital products are based upon tests believed to be reliable but do not constitute a guarantee or warranty. All INX Digital products are sold with the understanding that Purchaser has independently determined the suitability of such products for its purposes. It is expressly agreed and understood that INX Digital's sole obligation and Purchaser's exclusive remedy under this warranty, or under any other warranty, express or implied or otherwise, shall be limited to servicing (replacement or repair) of the affected wetted parts of the printer if the proper claim process is followed and it is found that INX Digital's Triangle® inks are the sole cause of the failure.

NOTIFICATION OF CLAIM

This Ink Train Warranty requires that INX Digital and/or its authorized Triangle® agent or distributor be notified in writing of any claims within three (3) days of suspected failure. In order to make a warranty claim, the proper escalation procedure must be followed:

_ Completed TS1 form submitted to the authorized Triangle® dealer through whom the inks were purchased along with supporting photographs, test prints or other documentation that will assist INX Digital in the evaluation of the issue submitted with the TS1

_ TS1, TS2 and TS3 (where appropriate) submitted

_ A documented TS issue must be created (done after customer submits a completed Tech Support form via the Triangle® website)

_ Documentation of printer OEM and INX Digital preventative maintenance suggestions

_ Completed Proof of Ink Conversion and Warranty Registration Form (see Appendix A)

INX Digital reserves the right to inspect all reported claims. Failure to comply constitutes a waiver of all rights under this Ink Train Warranty.

With required documentation, all settlements first require the approval of the INX Digital President. With approval, service will be provided or credit will be given to the appropriate customer account as per the terms of this warranty.

CONDITIONS TO WARRANTY

This warranty will apply to failures resulting from normal use of Triangle® inks and it will apply only if:

_ All Triangle® inks were directly supplied by INX Digital or any of its authorized Triangle® distributors or dealers.

_ Triangle® inks were stored at all times, prior to their use, following the recommended storage conditions (see individual bottle labels for specific ranges).

_ All Triangle® inks are used within 6 months of delivery or its otherwise noted shelf life.

_ All Triangle® inks are used in accordance with all specifications, recommendations, instructions and manuals provided by INX Digital or any of its authorized Triangle® distributors.

_ Triangle® ink and/or bulk ink delivery system has been installed by an authorized Triangle® trained technician.

_ Triangle® dealer or distributor must have participated in Triangle's® technical training seminars and have complied with all terms of the Triangle® Dealer Agreement

_ Customer has not failed to timely complete any payment due to INX Digital or any authorized Triangle® distributor.

_ Triangle® dealer, distributor or user must provide a verified print head shot count report and age of any Epson manufactured print heads involved in an INX Digital warranty claim. Epson print heads exceeding the shot count limit of 6 billion will not be covered under INX Digital's Ink Train Warranty.

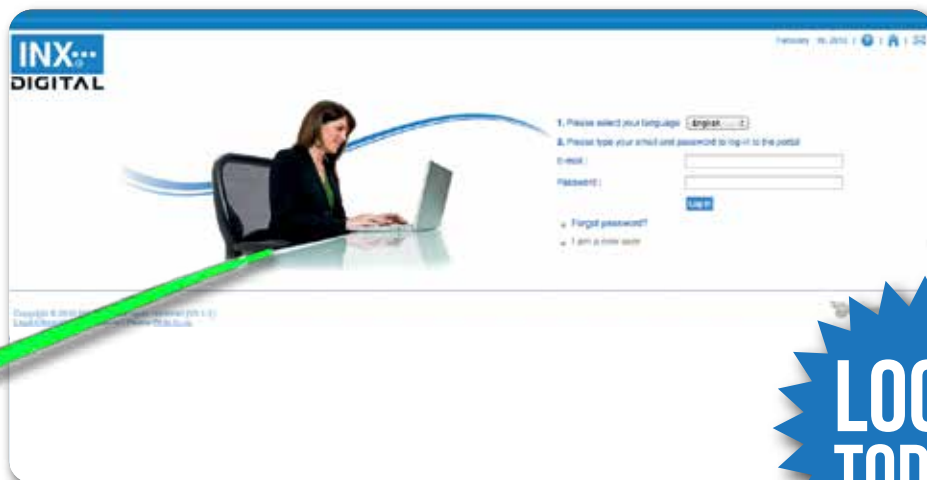

WARRANTY LIMITATIONS

Limitation of Product Misuse. This warranty does not cover printers that are modified or damaged through misuse, abuse, accident, vandalism, neglect or mishandling of processed or unprocessed materials by Purchaser or any other person. Before using for any other application, user shall determine the suitability of the product for its intended use and user assumes all risk and liability in connection therewith.

NO EXPRESS WARRANTIES AND NO IMPLIED WARRANTIES, WHETHER OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR USE, OR OTHERWISE, EXCEPT AS SET FORTH ABOVE (WHICH IS MADE EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES) SHALL APPLY TO THE PRODUCTS DESCRIBED HEREIN. INX DIGITAL SPECIFICALLY DISCLAIMS AND EXCLUDES ALL OTHER SUCH WARRANTIES. NO WAIVER, ALTERATION, ADDITION OR MODIFICATION OF THE FOREGOING SHALL BE VALID UNLESS MADE IN WRITING AND SIGNED BY AN AUTHORIZED REPRESENTATIVE OF INX DIGITAL INTERNATIONAL CO IN NO EVENT SHALL INX DIGITAL BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES INCLUDING, BUT NOT LIMITED TO, LOSS OF PROFIT, LOSS OF USE OR PRODUCTION OR LOSS OF CAPITAL. INX DIGITAL'S LIABILITY ON ANY CLAIM OF ANY KIND SHALL IN NO CASE EXCEED THE AMOUNT EXPRESSLY PROVIDED FOR IN THIS WARRANTY. THIS LIMITATION APPLIES REGARDLESS OF WHETHER THE DAMAGES ARE SOUGHT BASED ON BREACH OF WARRANTY, BREACH OF CONTRACT, NEGLIGENCE, STRICT LIABILITY IN TORT, OR ANY OTHER LEGAL THEORY.

AVAILABLE 24 HOURS A DAY, 7 DAYS A WEEK, SMARTINX.COM HAS COURSES AND TOOLS DESIGNED SPECIALLY FOR YOU TO GUIDE YOU THROUGH OUR COMPANY, PRODUCTS, RECENT INNOVATIONS, SALES TIPS, AND MUCH MORE. IT'S EASY AND FAST! **LOGIN TODAY!**

As the traditional printing world continues to evolve with digital printing solutions, INX Digital is hedging its education efforts in the process. Following the successful introduction of a training portal for dealers in the third quarter of 2010, INX Digital recently upgraded its www.smartINX.com web site that is available 24/7.

INX Digital manufactures and distributes inkjet inks and toners for a variety of industrial markets. The training portal provides a sales overview and insight into the products offered by INX Digital to dealers who desire to be registered with the company's global network. In the last year, INX Digital has introduced several new product lines of dry and liquid toner, plus a range of customized industrial inkjet inks including textile products and UV curable technologies. Initially available only in English when it debuted, the portal now offers Spanish and Portuguese training videos.

The smartINX.com portal is invaluable as a training tool and an information and reference center for our dealers and employees. Much time has been invested in creating videos, course materials, and a library as well as other educational content. This is another value-added resource not only for our dealers but our internal staff as well. We currently have three courses available, but are continuing to add resources to this project and will expand the portal. The world of digital is a very exciting place to be and we believe this technology tool will help grow our business and empower the global dealer network and channel program.

INX Digital employees have participated in mandatory training sessions and are well versed to assist and handle any questions dealers have. Dealers logging into the portal will find a section on how to get started, followed by a training catalog and objectives and access to the virtual library. They'll also find training solutions that will prove effective and get a better understanding on how the company's digital product technological advancements help with print performance.

Any dealer interested in registering with the INX Digital global network should contact their local company sales representative.

WIDE FORMAT INKJET INK

INK TRAIN WARRANTY

INX Digital offers the most comprehensive warranty in the industry. If inks are proven to be the cause of the printer breakdown, then INX Digital will provide parts, service or reimbursement costs required to repair damage to the ink train.*

*See warranty disclosure statement for details.

OUTDOOR DURABILITY WARRANTY

INX Digital backs its two-year products with its Worldwide Ink Durability Warranty. INX Digital's TRIANGLE® Inks have been extensively used for many years and exposed to virtually all global and outdoor climates.*

*See specific product durability warranties as some vary.

Ask a sales representative for INX Digital's complete Worldwide Ink Durability Warranty.

COLOR CENTER

INX Digital provides custom profiles to our customers. Every print shop is unique in its set up just as every printer is slightly different from the other. For this reason we offer to create custom profiles for our customers' various needs. For additional info: techsupport.global@INXdigital.com

TECH SUPPORT

Have any questions or issues that need to be resolved?

For additional info: techsupport.global@INXdigital.com

SPARE PARTS

INX Digital offers common replacement parts (at a significant savings over the OEM) for many of the printers that we manufacture ink for. These parts are the same parts that are sourced by the manufacturers themselves, refurbished, or are re-sourced to solve known problems.

For additional info: techsupport.global@INXdigital.com

COLOR COMPATIBLE

Look for our Color Compatible logo on our wide format products. Our TRIANGLE® brand continues to launch color compatible products. We have set a new standard internally for color compatibility with OEM profiles. When you see this logo on our literature or label you can feel at ease that we have raised the bar on simplicity for changing to a Triangle product.

In the near future you may be able to "choose your color gamut" with TRIANGLE®'s wide format line to meet your needs. This is in addition to being able to choose your chemical technology such as Bio, Eco or True solvent.

CHEMICALLY COMPATIBLE

We are also looking to make your changeovers to TRIANGLE® brand products easy with chemically compatible products. We have developed a new series of tests to assure that our products are forward compatible (our cartridge being inserted after the OEM) and backward compatible (the OEM ink being reloaded over our ink). This allows our users to feel a reduced risk in trying our inks.

SMARTINX.COM

Enhance your knowledge at smartINX.com, INX Digital's e-training portal. Learn the technical nuances of inkjet printing, how to sell alternative ink, and much more. Email info@INXdigital.com to request your username today!

EASYFILL BULK INK SYSTEM **MIMAKI JV33**

Eco Bulk is our new ink delivery system for wide format inks that takes a more sustainable approach compared to plastic cartridges while maintaining easy of use. With a unique cardboard design, it is comprised of one box instead of five 440 ml cartridges and houses the ink within a foil bag. Once emptied, the bag is disposed of and replaced. The foil bag can contain up to two liters of ink, double the current industry standard of one liter packaging which results in less waste. Additionally, a test program showed that more volume allows for greater consistency of the product being delivered through the network. Contact your sales representative to see if Eco Bulk fits your workflow!

THIS BULK INK SYSTEM INCLUDES:

ECOBK.JV33 ●●●
 Bulk ink system (To be used with Resetter)

ERJ334 ●●●
 EasyResetV3 is an automatic chip-emulation system

ECOBK.MIDCART.KIT
 The Eco Bulk middle cartridge replacement kit contains 2 replacement middle cartridges for use in the Eco Bulk bulk ink system. To maintain maximum reliability replacement is recommended every 6 months. See page 79 for re-order information.

EASYRESET ●●●

EasyReset is an automatic chip emulation system which overrides the electronic communication from the cartridge chip to the printer and eliminates the printers dependence on OEM chips. At printer startup the EasyReset will automatically communicate to the printer that the ink level is at 100% for each color channel. A regular daily printer power cycle is all that is required to keep your EasyReset functioning at peak performance.

EASYFILL BULK INK SYSTEM MIMAKI JV5

Eco Bulk is our new ink delivery system for wide format inks that takes a more sustainable approach compared to plastic cartridges while maintaining easy of use. With a unique cardboard design, it is comprised of one box instead of five, 440 ml cartridges and houses the ink within a foil bag. Once emptied, the bag is disposed of and replaced. The foil bag can contain up to two liters of ink, double the current industry standard of one liter packaging, which results in less waste. Additionally, a test program showed that more volume allows for greater consistency of the product being delivered through the ink train. Contact your sales representative to see if Eco Bulk fits your workflow!

THIS BULK INK SYSTEM INCLUDES:

ECOBK.JV5 ●●●
Bulk ink system (To be used with Resetter)

ERJ54 ●●●
EasyResetV3 is an automatic chip-emulation system

ECOBK.MIDCART.KIT
The Eco Bulk middle cartridge replacement kit contains 2 replacement middle cartridges for use in the Eco Bulk bulk ink system. To maintain maximum reliability replacement is recommended every 6 months. See page 79 for re-order information.

EASYRESET ●●●

EasyReset is an automatic chip-emulation system, that replaces OEM chips. Every time you start the printer it generates a new code that takes the virtual ink level to 100% (440 ml per cartridge). Each time you need to replace a cartridge, following the printer user manual, the virtual ink value has to be restored to 100%. To do that, you need to restart your printer. When the machine is restarted the virtual ink value will be back to 100%.
