Proofing Papers -

White Satin (190 gram)	Standard 2-3" Core	GRACoL
-------------------------------	---------------------------	---------------

This instant dry, high resolution proofing paper uses a specially developed coating to minimize pigmented bronzing. The microporo an excellent surface to hold the darkest of black point while using up to 30% less ink over competitive medias. The ultra-low metan and commercial shade make white satin 190 a great choice for commercial and publication proofing. Works with dye and pigmente
