ClearShield Anti-Graffiti is highly flexible and highly chemical and UV resistant. Anti-Graffiti is perfect for applications in high traffic areas, and makes the surface easy to clean.

ClearJet is a solvent-based laminate for use on water-sensitive inks and substrates. ClearJet A2000 is highly flexible and easy to apply. Consider ClearJet for applications where ClearShield is not an option due to the water-sensitivity of the materials being coated.

ClearJet Fine Art Version is our solvent-based option for fine art applications that are water-sensitive. It is highly flexible and will not cause discoloration or react with the ink jet receptive layer of fine art substrates.
