ORACAL Decorative Window Films;

ORACAL Decorative Window Films offer a tremendous cost advantage in comparison to etched glasses made in traditional methods. This product range includes window films that are developed for long term use and suitable for large size graphic projects.

ORACAL Decorative Window Films can be used on acrylic plastic sheets, windows of shops, offices, lobbies, restaurants and conference rooms. ORACAL Decorative Window Films are also used on windows, glass doors and separators by laboratories and hospitals for privacy issues.

These products provide glass design options of highest quality, without changing the glass structure or blocking sunlight.

Example of ORACAL® Decorative Window Films

ORACAL Interior Design Window Films: Choose the pattern and apply!

Example of ORACAL® Decorative Window Films

Transparent Cal

ORACAL® 8300

Transparent film in 32 attractive colours for indoor and outdoor decorative design use on glass and plexiglass, especially window graphics.

Product benefits include:

- Transparent PVC film (80 micron) with UV stabilisers
- 32 glossy colours
- Solvent polyacrylate, permanent, transparent
- Dry and wet application

Example of ORACAL® 8300 Transparent Cal / Photo: Courtesy of Ryerson, USA

Optical Clear Film

ORAJET® 3352F

With the new digital printing film ORAJET® 3352F Optical Clear Film from ORAFOL, installation of glass decorations has never been easier. This optically clear film can be digitally printed, and the printed designs are then installed in full sheets making installation faster and easier than ever. In the areas on the film where there is no print, the ORAJET® 3352F film is so clear that it is hard to even notice the film. The film is suitable for indoor and short-term outdoor application and is easily removable.

Product benefits include:

- Ultra transparent top-coated polyester film (70 micron)
- Available with a glossy surface
- For indoor and short-term outdoor application on windows
- Wet installation possible
- Inkjet printing with solvent based inks, UV- or Latex inks
- Solvent polyacrylate, removable

Example of ORAJET® 3352F

Etched Glass Cal

ORACAL® 8510

Etched Glass Cal – with *Rapid*Air® Technology

ORACAL® 8510RA

Used for decorative design of shop windows and glass doors. Available in gold and silver-grey with hoarfrost effect, or an impression of etched, cut or sandblasted glass.

Product benefits include:

- Polymer PVC film (80 micron)
- Coarse and fine structure
- Wet application is recommended
- Solvent polyacrylate, permanent, transparent

RA product benefits also include:

- The *Rapid*Air® technology allows a rapid and bubble-free application
- *Rapid*Air® requires less application time and cost

Example of ORACAL® 8510

Etched Glass Cal

ORACAL® 8530

Exceptionally easy to remove

Product benefits include:

- Polymer PVC film (80 micron)
- **Exceptionally easy to remove**
- In silver with hoarfrost effect, or an impression of etched, cut or sandblasted glass (coarse and fine structure)
- For the decorative design of shop windows and glass doors
- Solvent polyacrylate, removable

Example of ORACAL® 8530

Dusted Glass Cal

ORACAL® 8710

Even more possibilities for decorative designs of glass areas, such as shop windows, room dividers and glass doors. Creates the look of a rough glass surface.

Product benefits include:

- Polymer PVC film (70 micron)
- Medium glossy surface prevents unwanted light reflections
- Wet application is recommended
- Solvent polyacrylate, permanent, transparent

Example of ORACAL® 8710

Frosted Glass Cast

ORACAL® 8810

For extra high quality glass decoration of shop windows and glass doors. Five variants available with hoarfrost effect.

Product benefits include:

- Cast high-performance PVC film (80 micron)
- Eye-catching, glamorous glitter effects
- Extreme resistance to weathering and UV
- Wet application is recommended
- Solvent polyacrylate, permanent, transparent
