

Introducing | An Ultra-Metallic Cast Vinyl

Lumina[®] 3710 is a premium cast vinyl film that is intended to be used in general signage, RV and marine applications, automotive aftermarket graphics, and striping. This series provides dynamic graphic accents due to its large metal flakes, high surface gloss, and exceptional color depth.

This new 4-mil film is offered in nine colors with more on the way. Standard rolls are available in 15" to 60" widths.

Lumina[®] 3710 is also available in 12"x12" standard-size sheets as part of FDC's sheeting program, which is ideal for craft and do-it-yourself projects.
